Allowable Subject Matter

1. Claims 66-79 are allowed over the prior art of record.
2. The following is an examiner's statement of reasons for allowance:

The closest prior art of record is U.S. Patent No. 4,774,664 to Campbell et al and U.S. Patent No. 5,521,815 to Rose, Jr.

Campbell et al disclose a financial data processing system including a central data bank storing information related to financial loan information including current status, payment histories, delinquency and collection histories associated with leases and leased property which can be accessed and updated by a plurality of remote offices. Campbell et al further disclose modules for indicating default conditions for a loan as well as modules to track and initiate a collection for a particular lease or loan.

Rose, Jr. discloses a system for verifying and tracking articles of value such as vehicles, boats, land, etc., and teach a centralized data base connected to various authorized agents such as insurance agents and car dealers, and to government agencies such as department of motor vehicles, tax collecting agencies and the National Auto Theft Bureau so that predetermined data on an item can be maintained on a centralized system which is accessible to all who need the information. Rose, Jr. further discloses that the centralized data base is connected to all parties ordinarily involved in transactions relating to the article and further allowing an authorized entity to be responsible for tracking of the and issuance of titles related to the article wherein a service provider is capable of transmitting and updating transaction data information in the database.

As per Claim 79, the closest prior art of record when taken either individually or in combination with other prior art of record fails to teach or suggest a transaction processing system wherein a recovery process is initiated and involves two or more actions specific to a property unit including locating, recovering possession of, managing, appraising and selling the property unit, and wherein the recovery process involves services to be provided by multiple service providers, wherein the recovery module receives reporting information regarding the recovery process electronically, provides automated coordination of the recovery process by coordinating communications with the multiple service providers

Art Unit: 3621

and automatically producing an output requiring action in response to the recovery module receiving reporting information from one of the multiple service providers. Claims 66-78 are dependent upon claim 79 and thus have all the limitations of claim 79 and are allowable for that reason.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
